

Dr. Po-Hsun Tseng

6+ years experience of large-scale software development with **C** programming on the **Linux** system throughout my Ph.D. journey. Seeking a challenging and rewarding opportunity with low-level system programming (eg. **device driver**, **Linux kernel**, **CPU architecture**) to apply my skills at a fabless company.

EDUCATION

Ph.D. in Computational Physics

📍 National Taiwan University, Taiwan

📅 08/2016 - 06/2022

- Developed and implemented a new algorithm to reduce numerical error by 10^6 compared to conventional one. See Fig. 16 in (<https://arxiv.org/abs/2012.11130>).
- Designed a new approach to further promote the robustness of GAMER. The new approach was adopted in the research project led by Dr. Kuo-Chuan Pan from Tsing Hua University. (<https://github.com/gamer-project/gamer/pull/60>)
- Worked on improving the GAMER collaborated with Dr. Tzihong Chiueh and Dr. Hsi-Yu Schive. See the Section *References*.
- A main contributor of the GAMER. (<https://github.com/gamer-project/gamer/graphs/contributors>)
- Built NIS, NFS, and Linux cluster from scratch with colleagues and worked with Dr. Hsi-Yu Schive to bootstrap simulations for research.
